

8. would you please explain the world to me?

would you please explain the world to me
cause i can't understand what's going on
would you please explain the world to me
there must be something deadly wrong
would you please be my guiding star
through my darkest night — my darkest hour
would you please explain the world to me
(cause) i'm losing faith in humanity

would you please lend me a guiding hand — to me lost in a sea of sorrow
let us save the earth — don't wait until tomorrow
would you please soothe my troubled mind — my fears are growing stronger
now is the time to do it — don't wait a minute longer.

there is no time to waste — no more time to waste
there is no time to waste — no more time to waste

will we ever learn to respect — our unique earth
and will we learn to take the fantastic chances we got
will we stop polluting our earth, the air and the oceans
or will we just go on without having the faintest notion

there is no time to waste — no more time to waste
there is no time to waste — no more time to waste

there's a big, big hole in the ozone layer
it's time to react right now
god show mercy to us — it's time to say a prayer
it's time to react right now
but nothing ever happens

see the ice at the poles is melting away
it's time to react right now
to save the world we have to go a long long way
it's time to react right now
but nothing ever happens

would you please explain the world to me
cause i can't understand what's going on
would you please explain the world to me
there must be something going wrong
would you please be my guiding star
through my darkest night — my darkest hour
would you please explain the world to me
(cause) i can't understand what's going on
(cause) i can't understand what's going on
(cause) it's obvious that we've got things wrong

9. live in love

i don't need no martyrs to die for me
i don't need no religious leaders — i'm not too blind to see.
i don't need no moral preachers to show me the way
i don't need no glorified murder — what a perfidious game
there's no need for fanaticism missionizing the world
let's find the way to brotherly love — without denigration

in the end — we all live under the same sun
why are those fanatics so blinded by hatred
going to war right in front of the whole world?

let's live in love — we'll believe in every day
let's build a world — a world set free
where we can feel safe — till we are old and grey

there's no need for inflammatory speeches building up walls
there's no need for a bomb's destroying us all
there's no need for bitter enmity when hope is in your heart
but are we clearly dealing with geniuses

perhaps we all believe in the same god
why are these maniacs so blinded by hatred
going to war right in front of the whole world?

10. this can't be the end

baby, when i look at you it's hard to believe that we shouldn't go on
baby, when i look at you i cannot believe that there is something wrong

don't you know how i feel about you? my life without you is going to be a mess
don't you know how much i need you? and you say you do need me —
so why do things have to change?

why can't it stay like this forever?
why do all good things come to an end?
why can't the two of us just stay together?
i do love you, you do love me — this can't be the end ...

baby, when i look at you i sometimes wonder if you told me the truth
baby, now look at me — can't you see i'm blue?

don't you know how i feel about you? my life without you won't be worth living
don't you know how much i need you? and you say you do need me —
so why do things have to change?

11. who has the right

they had been resting there for more than two thousand years
since their lives were wiped out by the plinius catastrophe

as the first pyroclastic wave deflated the oxygen
they swore they'd die together in the name of love

by surprise they found them, digging a hole in the ground
in the name of science they disturbed their peaceful sleep

so tell me ... who has the right to separate what god united?
won't you tell me ... who has the right to separate what love united?

they had no chance to escape as the volcano took revenge
and erased all life in the city of pompeji

when they found them no one could imagine the tragedy
and so they removed his hand right out of hers

additional bonus track :
12. christmas in your heart

this is the holy night
time to calm down your senses — babe
see the joy in the children's eyes
forget all your defences

this is the silent night
snow is slowly falling
find a little peace inside
love is calling you — is calling you
then you'll feel christmas in your heart

this is the night divine
time to think things over
take a little light into the world
the star will guide the way to love — the way to love
then you'll feel christmas in your heart

let it touch you deep inside
all the feelings you've tried to hide for so long — they can't be wrong
let it touch you deep in your soul
let christmas fill that hole you've tried to hide for so long — it can't be wrong

when you're used — feeling down, then you feel the love around
then you feel Christmas in your heart
when you see that star above, can you feel all the love
then you feel Christmas in your heart
then you feel Christmas in your heart
find a little peace inside, find the feelings you tried to hide
then you feel Christmas in your heart
then you feel Christmas in your heart

credits

sebastian reuter	lead and backing vocals, acoustic guitar
heiko göttel	guitars
kilian nickel	piano, keyboards, backing vocals

1. dream police

number 491 just fell asleep
roger, put him on the screen
it's time to start the mission
his eyes are closed — his breath is slow
alpha 1 just start the show
hq connect the dream machine

we are the dream police — dream police
we are watching while you sleep
we are the dream police — dream police
we help you count your sheep
none of your thoughts — none of your dreams
are private anymore
that's what we are working for

2nd corner central park
there he's standing in the dark
the one who lit the cigarette
now he's walking down the road
stay in contact — don't let him go
this time we have to get him

so you think — it's nice to kill a whole school
so you think it's fun to rob a bank
every crime you try to hide leaves traces in your neurons
it's just a simple scan and we can easily detect your mind —
we can look inside

refrain

hey you little sleepyhead — can you touch the things you see while you sleep?
but we can — yes we can — yes we can ...

big brother is watching you and you can't escape the almighty
well orwell was yesterday but this is not a vision anymore

so you think you can blow up an airplane
or build the perfect dirty bomb
every crime you try to hide leaves traces in your neurons
it's just a simple scan and we can easily detect your mind
— we can read your mind

2. scary karen

her tits are absolutely perfect — her eyes are promising hell
her body is worth the sin, cause everything is in place
she will be the centerfold of the year — won't you agree with me?
but she's an illusion — you better don't trust your eyes
cause every part of her body is a surgeon's charity

her name is karen — she's livin' next door
she's one of those girls you wanna die for
but be careful — you can't be sure if it's silicon you're yearning for ...
"scary karen" — she's called "scary karen" ...

she wears a beautiful tramp stamp on her backside — her plush lips blazing coral
her tight pants are driving me crazy
but she's an illusion — guarantee to blow your mind
cause touching her body is dangerous — a deadly game

scary karen — living next door
she's one of those girls you wanna die for
but be careful — you can't be sure
if it's silicon you're yearning for
scary karen — living next door
her bittersweet smile you can't ignore
but be careful — you can't be sure
if it's spare parts you're yearning for

3. baby don't cry

there's a letter on the table — they're calling me away
i see that you've been crying — cause you want me to stay

i swear it's not forever — the time will pass
i swear it's not forever — i'll come back home

baby don't cry
cause there's no reason for — goodbye
baby don't cry
soon i'll be standing at your door

now you're lying in my arms — not willin' to let me go
i'm holdin' you close — there's one thing you should know

please dry the tears you cried i'll be back real soon
just remember my love is true — in my heart there is always a place for you
no matter the distance between us

4. grand piano

i often think back to this time
when i was sitting on your lap
you played the grand piano
just for me

i sleepily followed the melody
and prayed it would never end
this heart-rending song
you played for me

but now the grand piano fell silent
it's strings are rusty too
this song's still clearly ringin' in my ears
i can hear your voice whispering to me
you will play this song once more for me i know
the day i'll die

you went away so far
too far to reach you now
but i'm still missin' that song
you played for me

when will we meet again
reunited for eternity
strumming on the keys
playin' our song?

refrain

i hope wherever you are now
that you're able to soothe the pain
i dream one day we'll meet again
playin' our song
that tells the story of our lives

5. man with a vision

he's a man with a vision
who stands strong for his position — money makes the world go 'round
money in the bank — money in the bank — money

how could a small town boy coming in to london
become a big, big number in the lse
money in the bank — money in the bank — money

get ready — keep steady and keep on going
keep ready — keep steady and hold your head up high — money makes you fly
keep ready — keep steady and keep on going
keep ready — keep steady and hold on to your dreams — really easy as it seems

living seems to be so easy
when you're the shooting star on the horizon — money makes the world go 'round
money in the bank — money in the bank — money

everybody's darling losing touch with reality
so what about me and you and the ones that we love?
money in the bank — money in the bank — money
once they forced him to push the wrong buttons
so his world could never be the same — tell me who's to blame.
when you give up your dreams — when you give up your identity
tell me who is to blame — tell me who is to blame — when you deny your name ...

get ready — keep steady and keep on going
keep ready — keep steady and hold your head up high — money won't make you fly
keep ready — keep steady and keep on going
keep ready — keep steady and hold on to your dreams — ain't as easy as it seems

visions — where are the men with visions who want to save us now?

6. please fight for me

maybe you've had very bad times, maybe very hard times
now you are afraid of being hurt again
maybe you've been used — you've lost your instinct to trust
won't you show your true emotions?
can't you see — here's someone who loves you
give a little love to me — cause i'm the one you who cares for you
i'm the one — i'm the one who loves you
and i'll never — and i'll never let you down

it's a silly situation — a tricky combination
i can't solve a problem without causing another
why can't we try to stop playing hide and seek
maybe there's a way we can come together

can't you see — here's someone who loves you
give a little love to me — cause i'm the one you who cares for you
i'm the one — i'm the one who loves you
and i'll never — and i'll never let you down

don't be afraid to be hurt once more
cause if you don't try, you will never know
don't be afraid of the way you'll go
cause if you don't try — if you don't try — you will never know

7. dreamland

once i lived in a dreamland — everything's seemed to be alright
the sun was shining the kids were out
singing a song clear and strong

that song sounded so familiar
it was sung by everyone
who was around come sing it loud
this well-known song our song

it's our dreamland
our place to be
and everyone should be in here

life is a wonderful game
so come let's play it together
and all in one big dream
to be the best we can
so we could live in a dream

the kids just kept on singing
all together no one alone
cause in this world there's no hate no fear
who wouldn't want to live here

if we all play the game together — the world could be so wonderful
i know our dream could be reality — if everyone agrees
